Ship Name: S-78

Reason for Application: Stop unwanted noise and vibration in the living quarters

Mils Applied: 40 mils (1.0 mm)

Time to Complete: 3 days

Quote from end user and/or applicator: Although the S-78 is no longer the largest Storm yacht available, it remains the flagship of the fleet. As one of the more important designs to Storm's business, it is imperative that it be as comfortable as possible for those aboard. To ensure that noise and vibration were not bothersome to those aboard, the customer decided to use Mascoat Sound Control-dB. This allowed them to keep noise to a minimum, and makes the S-78 an extremely quiet and comfortable vessel.
