

Chemical Company – Personnel Protection

Client Name and Location: Chemical Company- Beaumont, TX

Date of Application: August 2014

Mascoat Representative: Michael von Schade

Applicator: Apache

Coating Used: Mascoat Industrial-DTI

Application: Vapor Lines

Dimensions: 8" and 12" Stainless Steel piping at various lengths

Reason for Application: Personnel Protection and prevent Corrosion Under Insulation

Mils Applied: 60 mils (1.5 mm)

Time to Complete: 2 days

Application Notes: When these pipes are put into service, they will be operating at 220°F (104°C), and will be in close proximity to areas commonly accessed by employees of the chemical company. After a few successful applications with Mascoat in the past, this chemical company knew that the coating would adequately protect their staff from burns with only 60 mils (1.5 mm) of the coating applied. Not only that, but they are also excited to about the coating's ability to prevent corrosion under insulation and have constant inspectability of coated piping.
